

Project Study: Controlling [KPI] Dashboard & Data Visualization

About us

Müncon is a young consulting firm focusing on the energy sector, especially on renewable energy. At Müncon, we live consulting in a way that is pragmatic, authentic and free of elite and egos. We set out to make the world a better and more sustainable place.

Project Study

While big companies pay millions of dollars for controlling software and visualizing their internal data, small and medium sized enterprises (=SMEs) oftentimes limit themselves to basic KPIs in their year end report – without any visualization. Therefore, SMEs have the need for an easy-to-use software, which makes controlling tangible. Your team will develop their own controlling dashboard based on dummy data.

Your task

- Getting familiar with important KPIs and controlling standards
- Research existing software solutions (PowerBI, Tableau, ...]
- Build a dynamic Dashboard (based on the software you choose) for controlling based on data provided by Müncon. This dashboard will be developed closely with us, with weekly update and discussion meetings.

Your Profile

- You are passionate about finance, controlling and programming
- You can work in a very detailed way, but have no problem to abstract that knowledge
- In the best case, you have experience in programming or in Excel
- You speak your mind and like to work autonomously
- Please send your application and your CVs to the address below

We offer

- Regular meetings and feedback session – we want you to learn from this project and gain experience for future positions
- An office right at the heart of Munich, where you can always work if you want to (you can also work remotely)
- Vast experience in guiding students from previous positions
- A young team, fast decision making, and flat hierarchies
- We will take time for coaching you as a team

Earliest start date: July 15th 2022

For applications, contact:
Felix Hagleitner
felix.hagleitner@mucon.com
mucon.com
Müncon GmbH

University supervisor:
Depending on your campus
(Munich or Heilbronn)
We take care of this, vast
project study experience.
